Subject: object to residential conservancy designation

Dear Council Members

We live at 5831 Packard Lane on the South Side Of Eagle Harbor.

Packard Lane and Rose Loop waterfront homes currently the shoreline residential conservancy designation in the current draft smp.

We live in a harbor with 2 superfund sites.

We live in a harbor with over 5 marinas.

We live in a harbor with a ferry maintenance yard and ferry landing and a city park.

There is a sewer outfall for all of Winslow at the mouth of our harbor.

We have bulkheads to protect our homes so that our homes don't slide down the bank. They were legally permitted and we have a geo tech report to show that they are necessary.

We have encumbered our bedlands with docks.

It is ridiculous that our banks be declared feeder bluffs

It is ridiculous that property be designated shoreline residential conservancy/

We object to the designation. We object to the label. We ask the label of shoreline residential conservancy from the SMP

. We ask that you remove the label of shoreline residential conservancy from the south side of Eagle Harbor.

Kari and Joel Wright
